

Abstract

We are developing a website for furniture store. the main objective of this site making is that we can give many choices to the people who want any furniture to done at their homes or offices.as a traditional way we call carpenter lookout our home to him and tell him to make a beautiful view using furniture. We ask carpenter to please show your previous work so mostly he has few photos of his work. Here we provide a site where he can upload all his good work and people can see and explore his furniture work.

Beyond of this all we also providing a workspace in our website where user can upload his own design and ask the carpenter to handover this design model to him.
